Project management skills are needed in almost every field and industry. CompTIA Project+ is designed to give you skills needed to successfully manage small- to medium-sized projects.

Project+ covers the project life cycle, from initiation and planning through execution and closure. Participants will develop skills necessary to effectively manage a project at each phase by learning to:

- Identify the fundamentals of project management.
- Initiate a project.
- Create project plans, stakeholder strategies, and scope statement.
- Develop a Work Breakdown Structure and activity lists.
- Develop project schedule and identify the critical path.
- Plan project costs.
- Create project staffing and quality management plans.
- Create an effective communication plan.
- Create a risk management plan, perform risk analysis, and develop a risk response plan.
- Plan project procurements.
- Develop change management and transition plans.
- Assemble and launch the project team to execute the plan.
- Execute the project procurement plan.
- Monitor and control project performance.
- Monitor and control project constraints.
- Monitor and control project risks.
- Monitor and control procurements.
- Perform project closure activities.

CompTIA Project+ certification validates that project managers and team members have the classic project management skills to help them complete projects on time and within budget. This training can be a significant part of your preparation for the CompTIA® Project+® certification exam.
